The Region's Largest Independent Battery Distributor

EnerSys and its predecessor companies have been manufacturers of industrial batteries for over one hundred years. Their Reserve Power batteries are marketed and sold principally under their PowerSafe, DataSafe, Hawker, Genesis, ODYSSEY and CYCLON brands. They manufacture and sell related direct current DC power products including chargers, electronic power equipment and a wide variety of battery accessories. Their battery products span a broad range of sizes, configurations and electrical capabilities, enabling them to meet a wide variety of customer applications. DJT Associates, an affiliation of Northeast Battery, is EnerSys' exclusive Manufacturers Representative for Telecom and UPS applications, throughout New England and segments of New York and New Jersey

DataSafe HX valve-regulated, lead-acid batteries are designed for use in UPS applications, which demand the highest levels of security and reliability. DataSafe HX batteries incorporate select design features that maximize reliability while ensuring superior performance and an excellent service life. All DataSafe HX battery systems are rated at 100% initial capacity at initial discharge, and come with an industry leading three years full, plus seven years pro-rata warranty. DataSafe HX batteries are also available in Cabinets or with racks, rated to UBC Zone 0, as well as, at or below grade Zone 4.

SigmasTek is a leading supplier of Valve Regulated Lead-Acid (VRLA) batteries. SigmasTek products are utilized all over the world for UPS (Uninterrupted Power Supply), mobility, medical, emergency lighting, security, telecommunications, and many other critical applications. Our dedicated manufacturing facilities ship over a million batteries per month and have been certified to meet SigmasTek's world class quality and performance requirements.

C&D Technologies, Inc. Standby Power engineers and markets batteries, electronics and fully integrated power systems which provide back-up battery power in the event of a primary power loss or interruption. Meeting the needs of customers in the telecommunications, uninterruptible power supply (UPS) and utility, switchgear and control, cable, broadband, and solar markets, C&D offers a wide selection of products for all of your Standby Power needs.

C&D Technologies' Dynasty Division, designs, manufactures and markets a wide range of VRLA batteries specifically designed for the high rate discharges required for UPS Standby Power Applications. Their UPS High-Rate MAX series offers reliable, high energy density, VRLA solutions for every UPS application from large Data Centers to small individual systems to assure that your critical business systems run "Uninterrupted". Their industry leading TEL-Series were designed specifically for the longer duration discharges associated with Telecom Standby Power Applications.

UltraPower batteries are designed with and utilize industry leading technology; they are built to the highest industry standards. Our UltraPower UPMax-Series were designed for high rate discharge applications in uninterruptible power supplies; and are available in sizes from 150 to 620 watts per cell. The UltraPower UPT-Series were engineered specifically for long duration discharges found in a vast array of telecommunication applications; and are available in sizes from 30 to 180 ampere-hours. UltraPower batteries are exclusively distributed by Northeast Battery and our affiliates.

EnviroGuard is the global leader in battery spill containment and environmental health & safety training. They provide customers with a complete line of safety equipment and other supplies for the battery room. Their product line includes a wide variety of safety and compliance products including spill containment, spill clean-up kits, protective eye wear, tools, hydrogen detectors, battery watering carts, and much more.

Founded in 1925 by George Godber and Carl Speer, Trojan Battery Company is the world's leading manufacturer of deep-cycle batteries. From deep-cycle flooded batteries to deep-cycle AGM and gel batteries, Trojan has shaped the world of deep-cycle battery technology with more than 85 years of battery manufacturing experience. Trojan batteries are built on our historically-proven deep cycle technology and designed to meet the complex requirements of today's advancing applications for Golf and utility, NEV, commercial trucking, marine, floor machines, aerial work platforms, material handling, recreational vehicles and renewable energy.

From layout and design to installation and service, our engineers and service technicians can provide customized solutions to maximize productivity and efficiency. Our service technicians are factory trained to design, test, install and service any stored energy solution for industrial applications. Our expertise can help with planning, engineering, project supervision, certification and grounding surveys. We can also provide data analysis, equipment testing, and charger efficiency testing.

REGIONAL WAREHOUSES:

449 W. Fountain Street, Providence, RI 02903
200 Saw Mill River Road, Hawthorne, NY 10532
345 State Street, Auburn, NY 13021

2745 Broadway Street, Cheektowaga, NY 14225
5800 Ellwood Avenue, Bristol, PA 19007
3920 Vero Road, Baltimore, MD 21227
5921 School Avenue, Richmond, VA 23228
